

We are trying to grow our research fund
for biomedical research into ME.
Green fingers anyone?

JiMER Christmas | New Year Fund Appeal

Myalgic Encephalomyelitis (ME) is a serious, chronic neurological disease. UK Charity Invest in ME Research wishes to establish a Centre of Excellence for ME, a hub for research activity in Europe, and enable a strategy of high-quality biomedical research projects to follow, coordinated and collaborating with other institutes. Please support our Christmas / New Year Fund Appeal.
